Amatex Thermoglass™

Manufacturers of industrial heat resistant textiles - featuring Thermoglass™ fiberglass products, silica fabrics, and proprietary treated and coated products.

Thermoglass™ Knit/Braided Rope - Hearth & Stove Industry

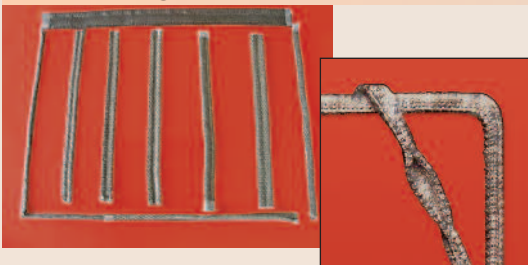

- Used for oven and door seals and packing channels, boiler applications and furnaces. Temperature rating to 1000° F (538° C) diameters (Outside) available - 3/16" to 1 1/2".
- 7 Densities range from soft to low & medium and extra high density.
- Available with permanent graphite black and pressure sensitive adhesive transfer tape for ease of installation.
- Square rope - High density-sizes 3/8" to 1 1/4", made to order.
- Packaged in 34 Lb. box.

Thermoglass™ Woven Window Tadpole Gasket Additions - Hearth & Stove

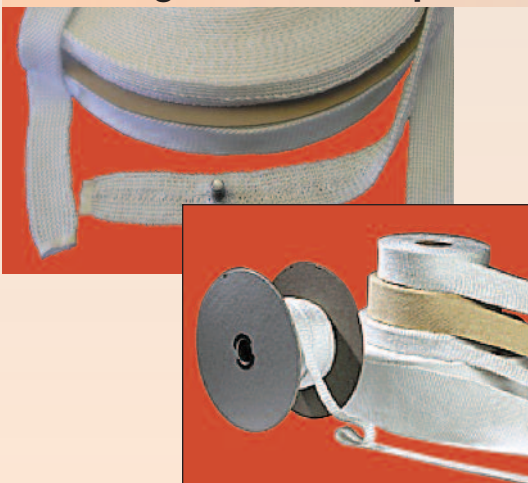

- Seals for oven doors, wood, gas & coal stoves, boilers furnaces, direct vent fireplaces. Temperature rating to 1000° F (538° C).
- Tadpole width range - 1" to 1 3/4".
- Bulb thicknesses - 9/32" to 1/2". Tail thickness - 1/16".
- Available with permanent graphite black and pressure sensitive adhesive transfer tape for ease of installation.
- Packaged in 35 Lb. box.

Thermoglass™ Woven Window Channel Gaskets - Hearth & Stove

- Groove channels for window and stove applications. Temperature rating to 1000° F (538° C).
- Standard widths - 3/4" to 1" - Custom sizes on request.
- Available in plain white, black graphite and with pressure sensitive adhesive transfer tape.
- Packaged in 25 Lb. box, on spools.

Thermoglass™ Knit Tape - Hearth & Stove Industry

- Alternative sealing product for stove and window. Temperature rating to 1000° F (538° C).
- Standard widths - 1/2" to 1" - Custom sizes on request.
- Finish variations - Black graphite, pressure sensitive adhesive (PSA) applied. Packed in 34 Lb. box.

Flextex Knit Tape

- Unique knit construction. Designed for 90 degree fold. Temperature rating to 1000° F (538° C). Durable abrasion resistance.
- Available thicknesses - 1/16" to 1/8".
- Available widths - 1/2" to 6"
- Packaging - 100 feet rolls, or spools. Custom lengths on request.
- Finish variations - Black graphite, pressure sensitive adhesive (PSA) applied.

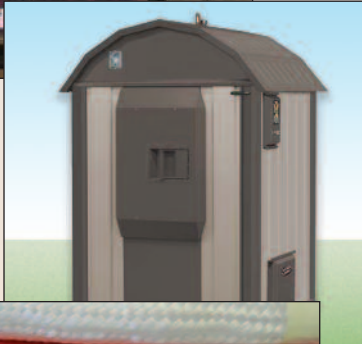

Amatex Thermoglass™ Product Lines *continued*

Amatex Thermoglass™ - Wood & Gas Burning Stove Products

- Seal and insulate wood & gas burning stoves for safety. Famous **Thermoglass™** construction products.
- Temperature rating to 1000° F (538° C). Also designed for coal and pellet stoves
- Tadpole tapes window gasketing
- General gasketing ropes:
 - Braided
 - Knitted
 - Twisted } **Made to custom density or stiffness.**
- White or black graphite products
- Pressure sensitive tape for most products to simplify installation
- Thermoglass™ woven and knit tape

Amatex Thermoglass™ - Fireplace & Boiler Products

- Rope gasketing, made in custom densities:
 - Low or soft density
 - Medium density
 - High or hard density
 - Extra high density - Samples available to check your requirements or needs.
- Square or round rope window gaskets.
- All products may be custom tailored to your applications:
 - Braided ropes
 - Knitted ropes
 - Twisted ropes } **Made to custom density or stiffness.**
- All products made using high quality **Thermoglass™** fibers.
- Flat knitted tapes used for sealing flat surfaces or as gaskets for fireplace windows.
- Products are flexible for ease of installation using pressure sensitive adhesive tape (PSA).
- All products are non-flammable.
- Products may be used to seal dust collection systems or pollution control equipment.
