

Bundling

Products which combine more than one item together to form a temporary unit

Application examples:

- bundling steel/plastic pipes, conduit tubes, metal rods, cylindrical tubes for shipping and/or storage
- combining cartons, parcels, lightweight items for reduced mailing costs
- pallet unitising for stabilising during transportation, shipping and/or storage

Holding Securing

Products used for the purpose of varied securing of different items

Application examples:

- securing doors of pieces of equipment units or internal items during the transport
- holding box flaps open to allow the boxes to be filled at more than one location in the packing chain
- holding of small items
- starting and tabbing of metal core

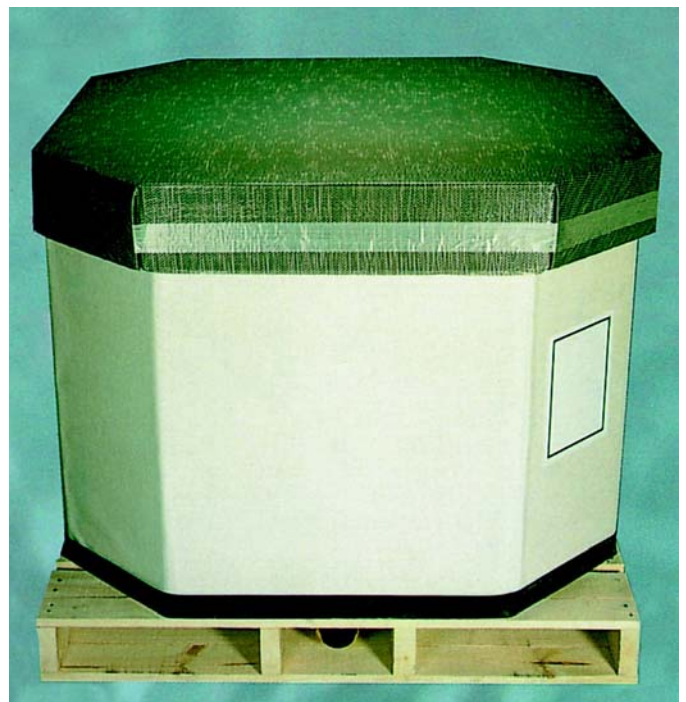

Reinforcing

Products used to strengthen the integrity of the packed content, carton seal and/or edge

Application examples:

- 'L'-Clips on overlap cartons for shipment and/or storage
- 'C'-Clips for regular slotted cartons for shipment and/or storage
- edge sealing large paper reels/jumbos for shipment and/or storage
- cable and pipe wrapping during in-line production

Sealing

Products used to close cartons for shipment and/or storage, when box sealing tape is NOT appropriate

Application examples:

- overlap cartons
- low temperature application/storage
- dispatch of high value products
- heavy cartons (> 50 kg)
- when box sealing tape is NOT meeting customer demands/expectations
- cartons containing hazardous material
