A Material Solutions Company

INTRODUCTION

As a stand-alone company, we cannot economically produce all the solutions we create. Nor would it be smart to invest capital and create overhead cost when many experienced manufacturing companies are established. Ultimately, GarCo works to serve the customer's interest.

GarCo Manufacturing is a multi-function service and manufacturing company focused on fiber, elastomer and adhesive solutions for industry.

Material and application engineering talents are a primary strength the GarCo team brings to the customer.

When you bring GarCo onboard your project, you're adding a team of dedicated, skilled and experienced professionals!

PRODUCT RANGE

Textiles: woven & non-woven aramid, fiberglass, silica & polyester for thermal protection, roofing, industrial and aerospace applications

Adhesive Systems: automotive, construction, electronics, aerospace, aviation, medical, printing & graphic arts

Tapes & Facings: FSK, ASJ, foil, SSL, filament, duct, PVC, BOPP for HVAC, construction, mechanical insulation & packaging markets

Elastomers: rubber products for power, chemical processing, automotive and petrochemical industries, as well as HVAC

Foils: specialty metals and hard to find alloys and gauges for a variety of applications

GarCo Sales Division

GarCo sales and technical teams work directly with specialty manufacturers of foil, textile, elastomer and adhesive products. Therefore, we offer many more solutions at affordable prices.

GarCo Materials Division

GarCo Materials focuses on unique solutions developed for specific customers and applications. We specialize in custom polymers, textile and rubber development, conversion and fabrication.

At GarCo, we pride ourselves in being a leader in both innovation and customer service.
